

A Fabrication Technician uses specialized equipment, such as metal welding, cutting, machining, drilling, punching, forming, and grinding tools, to build components for a variety of Cyclonaire products. As a Fabrication Technician, your duties are also to perform simple repair and provide daily preventative maintenance on equipment, perform routine inspections of the tools and equipment, and train people on how to care for the machines. A Fabrication Technician must be able to read technical drawings and follow instructions. Attention to detail and organizational skills are beneficial to have for this job.

Position Duties:

- Fabricate metal items using various techniques, such as welding, drilling, grinding, and sawing
- Read and interpret technical drawings
- Troubleshoot issues with the drawings or equipment
- Follow OSHA safety guidelines
- Follow all existing company policies and procedures

Position Requirements:

- High school diploma or GED certificate (preferred)
- Fabrication or welding experience (preferred)
- Excellent hand-eye coordination
- Ability to read a tape measure
- Ability to lift to 50 - 75 lbs.
- Ability to stand for extended periods
- Maintain clean and organized work area
- Daily equipment sign off's
- Forklift license (training provided)

What do we do?

Cyclonaire is a World Class Manufacturer providing Pneumatic Conveying Solutions to our customers across the globe. Every day in every corner of the world, Cyclonaire is integrating dependable solutions to move TONS. Our unique approach to solving problems is fostered by our ability to build relationships with our customers, suppliers and employees.

We take pride in knowing that the Cyclonaire team has had a hand in moving many of the materials we encounter in our everyday lives. From the rubber on our car tires to the concrete on our sidewalks, the sugar on our cereal to the diamonds on our fingers, the shingles on our rooftops to the batteries in our cars, Cyclonaire has tackled these challenges with our own version of creativity, grit and determination.

Who are we?

Our employees understand that **It Takes a Team** to provide high quality solutions for our customers. We are humble, loyal, and positive in all that we do. We display an **Attitude of Ownership**, understanding that our customers are depending on us. We are committed to the task and do what it takes to get the job done, taking pride in the finished product. We understand that **We Can't Be Awesome without Doing Something Hard**. We are hungry and driven to excellence; we work hard, and we have fun doing it. And finally, we **Do the Right Thing**. We walk the talk and lead by example, even when it hurts. It is these core values that lead to our continued success and keep our employees energized and eager to get the job done every day.

Sound interesting?

Cyclonaire is currently looking for a **Fabrication Technician** on our Production team. This team member will use specialized equipment, such as metal welding, cutting, machining, drilling, punching, forming, and grinding tools, to build components for a variety of Cyclonaire products.

The **Fabrication Technician** will perform simple repairs and provide daily preventative maintenance on equipment, perform routine inspections of tools and equipment, and train people on how to use and care for machines. You will work alongside the rest of the production team to ensure our customers are receiving a quality product that performs reliably day in and day out.

Are you qualified?

The **Fabrication Technician** must display a strong work ethic and attention to detail, as well as communication and time management skills, being able to prioritize multiple tasks. You will never be bored at Cyclonaire! An ability to read and follow blueprints and read a tape measure is required.
